

Do you want to...

- Realize **cost savings** by streamlining operations
- Deliver **outstanding customer service** with robust resident management tools
 - **Save time** by reducing the need for duplicating data entry
 - **Simplify and automate** RGI calculations, and interim and annual reviews
- **Identify trends and make informed decisions** with up-to-the-minute data and dynamic reporting

Then consider InSite

InSite is a web-based property management and accounting software package for small to mid-size providers and property managers. It offers a suite of integrated tools to help you and your staff quickly perform daily tasks seamlessly.

Maximize resources. Save time

InSite replaces the multiple systems often used to manage daily operations with a single, easy-to-use tool. With unlimited user accounts, your team will be better informed, save time and deliver outstanding customer service.

InSite System Features

Resident Management

- Wait list management for RGI and Market units
- Built-in RGI calculator and income verification wizard
- Full move-in/move-out administration and recordkeeping for all residents

Financial Management

- Full general ledger, accounts receivable, accounts payable, budgeting, cheque writing and electronic fund transfers
- Complete financial reporting including balance sheet, income statement, arrears database and budget comparison

Maintenance Management

- Create, manage and track work orders
- Schedule, perform and manage inspections
- Manage and track vendors with personalized vendor directory
- Track and search assets, such as appliances at unit level by serial number, make and model

Reporting & Analytics

- Built-in capacity to produce reports and analytics in various areas, including resident, property and financial management
- Ability to print, export and email reports, letters and forms in Word, Excel, or PDF formats

Stay Connected

- Available whenever, wherever business needs to happen with mobile app for smartphones and tablets
- Unlimited user accounts with access easily controlled based on roles
- Secure data storage with data backed up in multiple locations across Canada
